SEALIFE

# Flint 5.50

## SMALL DIMENSION, GREAT EQUIPMENT

It is the smallest of DOMINO range and perhaps for this reason its qualities are more in relief compared with other models. Flexible and perfect in any context, Flint owes its name to one of the most versatile stones in nature, used in past to shape blades and tips or to light the fire and today to realize transistor and integrated circuits or for the thermal insulation of space capsules. With the same finishing level of its the greatest brothers, FLINT is easy to carry around, but big enough to welcome 8 people. In the spacious living area with removable table, or on the couch / sunsuit astern or on the great bow sunsuit, all equipped with soft and resistant upholstery dressed in Movida fabrics, sewn and shaped by skilled artisans.

From the cockpit, equipped with electronic control of all utilities, the government of this boat , extraordinary maneuverability and seaworthiness , is made even easier by the sophisticated study of hydrodynamic lines of the profile, which are perfectly integrated shell resin molded and vacuum tubes made of high strength Hypalon. From the cockpit, equipped with electronic control of all utilities, the government of this boat , extraordinary for maneuverability and seaworthiness , is made even easier by the sophisticated study of hydrodynamic lines of the profile, in which shell resin molded and tubes made of high strength Hypalon are perfectly integrated.

# Flint 5.50
